

World of Safety

SUMMIT AND EXPO 2023

27TH & 28TH APRIL 2023

WE CARE

OVERVIEW

Maharashtra is the most industrialized state of India and also the most preferred destination for industrial investment. It is the manufacturing hub of India. With its vast reservoir of skilled manpower and most developed Industrial infrastructure, being a leader among industrially developed states and having its maximum number of the workers employed in the factories. It is imperative that safety of the work force is of paramount importance both at the state level and the industry level.

Maharashtra is having 37816 registered factories under the Factories Act, 1948, including 402-MAH, 5306-Hazardous and 3820-Chemical factories. It requires a lot of knowledge and training for ensuring safety at these factories. The culture of the cultivating the importance of safety among the workers and management is more prominent in Maharashtra. This activity is done by promotions of various safety training programmes, exhibitions and interaction with safety professionals. The safety and health of the workers in the factories are continuously monitored at micro level with the help of industry professionals. The Safety Awareness among industries is high, but a lot of work is still required to be done to ensure safety and health, so that it becomes world class.

SUMMIT AND EXPO 2023

is being held at NESCO Center, Goregaon East with Safety Appliances Manufacturers Association (SAMA) in coordination with Directorate of Industrial Safety and health (DISH), Maharashtra to create awareness, solutions, help create everlasting safe environment in Maharashtra. It will get all the stakeholders on one platform to debate, deliberate and create solutions to ensure all-round safety.

OBJECTIVE

The objective of this Conference is to emphasize the importance of safety of industrial workers and zero accident in factories

The need of hour is to construct a safety culture at the ground level and strategically plan & implement in a continual manner for fruitful results
